

Made in Germany / Made in the European Union

Amongst Urbanguard's products, many can be found which are promoted bearing those flags.

This tells clients the origin, either Germany or other countries of the European Union.

Most of those marked products are Urbanguard Innovations. Thus, we are responsible for design, patents, tool production and finally production. With such overall control we can offer products different to any of our competitors. We treasure whenever possible the chance to supervise the product quality and to streamline production and packing methods.

We hope to meet our customers' standards and expectations and now enjoy a high grade of international recognition for our product ideas, fairness and reliability.
