breaking strength 12 kg ( ref. ISO 1805 )

rot-proof  
resistant to chemicals  
temperature - resistant  
humidity - resistant

110607-16

\* as far as we know , \*\* not to be mistaken with milky-translucent material.

It is the better net !

- .. for lower heights,
- .. for smaller size nets,
- .. for shop fronts

Because it is less visible than any other net colour

- .. it is clear - not milky white
- .. it will pick up the colour of the background
