

PERMANET® Nets, NETFIXX Parts & NETTOOL Aids

Nets
to control
birds

The new world of nets

▶ All our black PERMANET bird management nets in 19 and 50 mm mesh sizes are now also flame-retardant. All nets are BAM certified, which can be identified by undoing the twine into single strands. One of the strands is lighter in colour

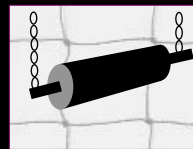

▶ In supreme polyethylene quality and make and BAM Certification

▶ In standard net sizes of 10 x 10 metres or made to measure

In many countries fixed nettings are subject to safer building laws which require flame-retardant building materials
