

# The new world of nets

- ▶ All black PERMANET bird control nets in 19 and 50 mm mesh sizes are now also flame-retardant. They can be indentified by undoing the twine into single strands. One of the strands is lighter in colour. All nets are B1 certified.
- ▶ Also in silver grey available
- ▶ In supreme polyethylene quality and make.
- ▶ In standard net sizes of 10 x 10 metres and in rolls of 2 x 100 m
- ▶ In many countries fixed nettings are subject to safer building laws, which require flame-retardant building materials.

- ▶ Nets in standard quality are also available in stone and translucent
