

Why is BATE SAFE better ?

internationally patented

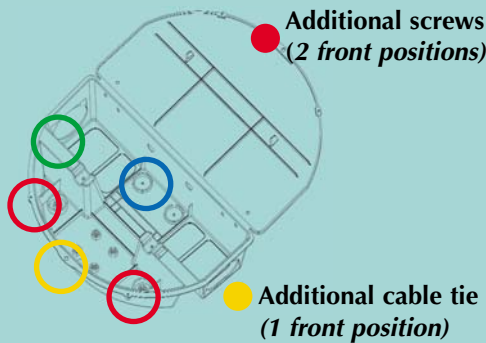

Biological Preferences & Avoiding Water Problems

- Wedge shaped feeding position (*high back*)
- Entry points opposite each other (*rats prefer visible escape route*)
- Open floor areas =
 - Spill-, Splash- & Rain-Water simply disappears
 - Rats prefer familiar ground

More Safety

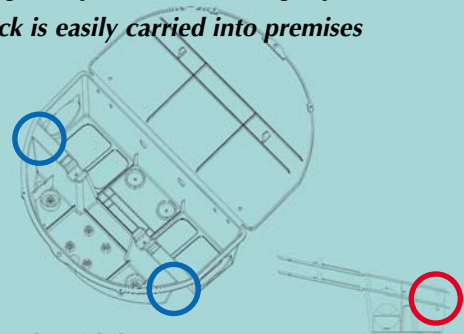

- Ideal for DownUnder anchor use

- Keyless opening (*shorter children fingers cannot reach opening lever*)

Economic Advantages

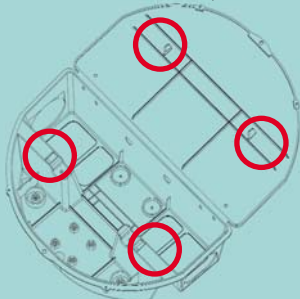

- BateSafe stack into each other (*saving transport costs & storage space*)
- A stack is easily carried into premises

- No hassle with key (*faster service / just pull levers to sides*)

Greater Stability

- Optimal design enhances stability of station (*weight on middle sections*)

- Many Fixing points to secure station and bait

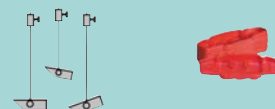

Options

- Standard colours

black

- Labels available, also custom-made labels

- Special anchors and Bait Trays available

Additional Features
