

**STIXX® SPIKE MODULES**
**BIRD MANAGEMENT**
**STIXX® VARIO SPIKES**

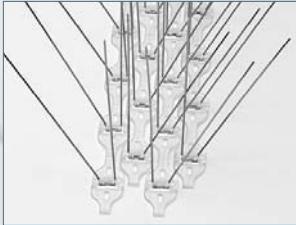

Length of double row modules = 33.33 cm

Height of modules = 11.50 cm

Base = Polycarbonate, UV-stabilised

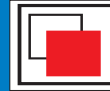

Pins = 316° Stainless Steel

*Spike Module to prevent birds from landing on ledges etc. Can be separated easily at snap points and into two modules of two rows of pins. STIXX VARIO is hardly noticeable on buildings and is generally used with a silicone adhesive.*

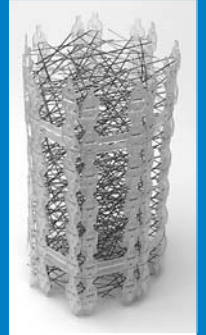

Slotting the separated modules into each other sideways enables deterrence of birds, smaller than pigeons.

*STIXX VARIO Modules are stacked into each other and save space and transport costs.*

packed in rolls (approx. 4.6 m) and in cartons of 28 m.

Code	Unit
STX108	28 m

20 cartons are packed on one EURO-Pallet.

## STIXX® SPIKE MODULES

## BIRD MANAGEMENT

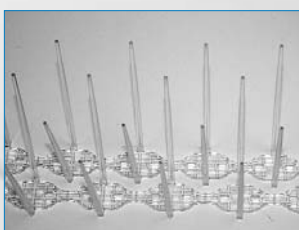

### STIXX® CRYSTAL SPIKES

Length of double row modules = 33 cm

Height of modules = 11 cm

Base & Pins = Polycarbonate, UV-stabilised

*Spike Module to prevent birds from landing on ledges etc. Can be separated easily at snap points and into two modules of two rows of pins. STIXX CRYSTAL is hardly noticeable on buildings, especially when light in colour. Generally used with a silicone adhesive.*

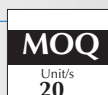

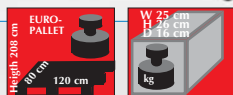

Slotting the separated modules into each other sideways enables deterrence of birds, smaller than pigeons.

Code	Unit
STX111	40 m

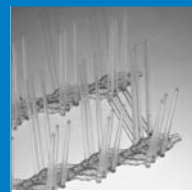

20 cartons are packed on one EURO-Pallet.

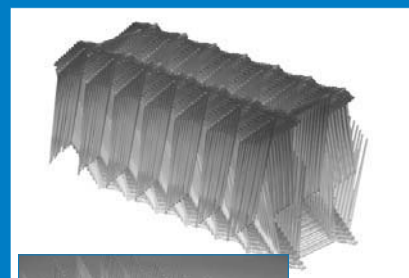

**New Product**

*STIXX CRYSTAL Modules are stacked into each other and save space and transport costs.*

condensed into packs of approx. 6.6 m and packed in cartons of 40 m.

### STIXX® CLIP

Clip to affix Spike modules STIXX VARIO and STIXX CRYSTAL to round edges of guttering. Use silicone adhesive additionally.

Code	Unit
STX109	20 pc
